Fixing and maintenance advices

Careful consideration and selection of the appropriate wall fixings according to the wall-mounted support is required to ensure the long life of your accessory. The use of stainless steel screws (\varnothing 4 mm) is highly recommended to prevent corrosion in damp environment. Before drilling, physically hold the product against the wall at desired position and mark the hole locations. All the fixing points must be respected. After installation and before use, make sure that all fixing screws are tightened securely.
